PROFESSIONAL PROFILE

Passionate Frontend & WordPress Developer based in Pakistan, with hands-on experience building modern business websites, WooCommerce stores, and interactive digital experiences. Combines clean, maintainable code with thoughtful design and performance-focused development practices using Elementor Pro, custom PHP, and modern JavaScript. Proven track record of delivering seven-plus live client projects across ecommerce, finance, tourism, and retail industries — from initial concept and UI design through to deployment, optimization, and ongoing support. Enjoys transforming client ideas into polished, conversion-focused digital experiences and is always eager to take on new freelance and long-term collaborative opportunities.

CORE SPECIALTIES

WordPress Development — Building custom, scalable WordPress websites using Elementor Pro, theme customization, and plugin configuration for small businesses and enterprises alike.

Interactive UI Development — Crafting smooth, responsive user experiences with HTML5, CSS3, modern JavaScript (ES6), GSAP animations, and Swiper.js sliders.

Ecommerce Solutions — Designing and building WooCommerce and Shopify stores optimized for performance, secure checkout, and long-term conversion growth.

Performance & SEO — Improving Core Web Vitals, page speed, accessibility, and search visibility through lazy loading, caching, and image compression.

EXPERIENCE SUMMARY

Website Development — Designed and deployed 7+ live business websites end-to-end for clients across UAE, Pakistan, and international markets.

Ecommerce Store Setup — Configured WooCommerce/Shopify stores including catalogs, variations, payment gateways, shipping, and coupon systems.

Client Collaboration — Worked directly with business owners to translate requirements into functional, brand-aligned websites as a freelancer.

Optimization & Maintenance — Improved site speed and Core Web Vitals scores through compression, caching, and lazy loading, with ongoing support.

Integrations — Set up analytics and marketing tools including Google Analytics, Meta Pixel, EmailJS, and Zapier automation for client websites.
